

BRENDA MUTAI

(773) 302-4642 | [email](#) | [LinkedIn](#) | [GitHub](#)

EDUCATION

Northwestern University, Evanston, IL June 2026 BA in Computer Science and Data Science | GPA: 3.80/4.00 | Dean's List 7 of 9 quarters | Relevant courses: Data Structures & Algorithms, Object Oriented Programming, Data Science, AI, ML

TECHNICAL SKILLS

Programming Languages: Python, C, C++, R, Java, JavaScript **Frameworks:** React, Firebase, Git, Node.js, VS Code

EXPERIENCE

Salesforce Inc., Software Engineering Intern, San Francisco, CA June 2025 – September 2025

- Designed and built an LLM-powered debugging agent to accelerate the team's root-cause analysis and fix cycle
- Created a custom MCP (Model Context Protocol) tool that takes a stack trace ID and automatically retrieves stack trace metadata referenced code files, and file ownership mappings
- Generated structured reports summarizing exception context, root cause, file paths, and both short-term and long-term fixes
- Auto-suggested and wrote proposed short-term code fixes in review-ready format, reducing debugging cycle time by 9%

Gudwork Inc., Software Engineering Intern, Oakland, CA, May 2024 – August 2024

- Designed and managed databases to ensure fast and reliable data access
- Developed and maintained scalable and efficient backend systems using PHP and Python.
- Developed endpoint APIs for the application, working across the codebase and repositories, under the CTO

Soma Reality, Software Engineering Intern, Los Angeles, CA, June 2023 - September 2023

- Designed and enhanced architecture for the Soma app, ensuring top-notch performance and user experience
- Implemented optimizations, resulting in a 30% increase in app responsiveness and a 25% reduction in server response times
- Created and implemented APIs, improving efficiency, leading to a 40% reduction in data transfer latency

PROJECTS

PowderPrep, April 2025

- Built a mobile-first web app to help skiers and snowboarders plan personalized packing lists for their trips
- Integrated real-time mountain weather and snow condition data to generate tailored recommendations
- Designed a Wardrobe feature where users can log their existing gear and generate gear reports tailored to trip destinations

TNE.ai Dashboard, May 2025 – July 2025

- Developed a web application for ML operations teams to monitor and diagnose the performance of multiple AI models
- Collected and analyzed system logs and error messages across deployments to provide a unified view of model health
- Automated manual log inspection and issue diagnosis, optimizing monitoring efficiency by ~70% and reducing downtime

LEADERSHIP EXPERIENCE

Women In Computing, Club Secretary, Evanston, IL April 2023 - Present

- Increased Fall 2023 membership by 30% through email announcements and involvement fairs
- Boosted participation in club hackathons by 40% through strategic planning and execution of activities

Northwestern University, Teaching Assistant, Evanston, IL, March 2023 - June 2025

- Supported 20+ students as a tutor for the Intro to Programming course by conducting weekly review sessions
- Guided students in debugging Python code and strengthening coding fundamentals
